

ALP479-38-SERIES

38-Gallon Outdoor Metal Waste/Recycling Receptacles

Outfitting your outdoor property with stable waste receptacles is imperative to eliminate litter. The most practical and resilient option is one of our 38-Gallon Outdoor Metal Waste and Recycling Receptacles. Its rather substantially sized holding capacity of 38 gallons requires less emptying by your maintenance staff, helping reduce worker strain. We've also included a retaining cable to each cover to ensure effortless removal of the metal liner. The body of the container is constructed with reinforced circular bands and rolled edges to guarantee it can handle daily wear and tear in all weather conditions. To better support your receptacle, we highly recommend our Rain Bonnet to prevent water and snow from flooding the metal liner. Our receptacles are excellent for parks, walking trails, recreational fields, outside offices, schools, and so much more. The Outdoor Metal Waste Receptacle and recycling receptacle polyester powder coating is ideal for outdoor use as it provides superior coverage, a polished finish, and deters vandals. Additionally, it makes it weather-resistant, so there is no fear of degrading color or finish. As soon as you buy our recycling and waste containers, you will be happy knowing your outdoor areas are litter-free and you've made a wise investment.

FEATURES

- Design:** Constructed with reinforced circular bands and rolled edges to ensure its longevity.
- High-Capacity:** The 38-gallon holding capability requires less emptying by maintenance workers.
- Coating:** A polyester powder that provides superior coverage, a polished finish, and deters vandals.
- Touch-Free:** Without touching the receptacle physically, the risk of cross-contamination is eliminated.
- Optional:** Our receptacles pair well with our Rain Bonnet, which prevents rain and snow from flooding your trash can.

Optional Compatible Rain Bonnet
