40-Gallon

All Weather Recycling Container With Advertisement Panels, Green Steel

When equipping your business's exterior with waste receptacles, you want to be reassured that it will last in the harshest weather conditions but is also aesthetically pleasing. With our 40-gallon All Weather Recycling Container With Advertisement Panels, you can check off both qualities and advertise while keeping your grounds well-equipped. Our receptacle features a prominent white recycling symbol on the panels, a large section to display the included stickers and 3 unique opening types to choose from to dispose of recycling materials properly. Its weather-resistant powder-coated steel frame and solid dome lid will ensure its longevity while maintaining its quality. The included heavy-duty plastic interior bin will securely hold trash bags without worrying about leaks. Since your terrain isn't always guaranteed to be perfectly flat, we have outfitted our trash container with adjustable legs. These trash receptacles are vital to keeping your facilities clean and elevating your aesthetic.

FEATURES

Protection: Equipped with a lock that will prevent tampering or vandalism.

Outfitted: Adjustable legs ensure stability and support.

Low Maintenance: Our substantially sized 40-gallon receptacle will require less emptying.

Included: Heavy-duty plastic bin securely holds your trash while preventing leaks.

Revenue: The advertisement panel will allow you to display any signage you like or even rent the space to other businesses.

Straightforward: To insert the advertisement panels, simply lift the lid and slide the panels in between the integrated notches.

Signage: Includes two Plastic & Glass, two Aluminum Cans, and two Recycling stickers; or two Paper stickers to customize this receptacle to your preferences.

Lid Opening: Choose from our 3 lid opening types that are perfect fit for various plastic and glass bottles, aluminum cans, or paper and cardboard, and other recyclables.

Permeable: The slotted bottom prevents any snow or rain from building up inside the receptable.
